

A Wider Surface of 25 inches adds stability when transporting large, heavy bodies.

Additional Versatility for stairs and small spaces by utilizing the loading wheels and transporting in the vertical position.

Optional Side-lift Handles provide additional lifting points for heavier patients while helping to navigate through rough terrain.

Unique Independent-leg Design allows the front legs to fold and unfold, while the rear legs, at the user's end, remain engaged, carrying the cot's weight into the vehicle. The design also allows for five height adjustments.

Optional Wheel Lock System, coupled with larger wheel diameter, provides greater mobility over a wide variety of surfaces.

Dual Release Handles for both front and back legs allow for one-person loading and unloading.
