

## ETCHEMLAB, INC

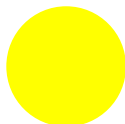

### DILUTION RATES FOR COMPLETE

Complete is a **DISINFECTANT/DEGREASER** super concentrated multipurpose cleaner/detergent/deodorizer that is guaranteed to clean even the toughest jobs when used as directed. Dirt and grime disappear quickly and easily from all types of surfaces.

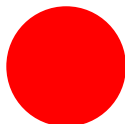

Use Complete right out of the bottle for extra tough jobs and disinfecting and dilute for more general cleaning. Dilution can be measured in ounces, cups and gallons, water-to-Complete as follows:

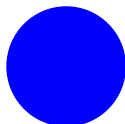

- 1) Disinfecting Do Not Dilute
- 2) Concrete Do Not Dilute ( wire brush recommended)
- 3) Hard Water Spots on Glass and Chrome Do Not Dilute (recommend 0000 steel wool pad)

- 4) Heavy Stain Removal 5:1 (ie. Coffee, wine, soda, liquor, etc.)
- 5) Oven Cleaning 5:1
- 6) Pet Stains 5:1

- 7) Walls & Floors 10:1
- 8) Carpet Cleaning/Machine 10:1
- 9) Automotive Paint Oxidation/Stainless Steel 10:1

- 10) Glass Cleaning 30:1
- 11) Furniture 30:1

In all cases except those noted we recommend the use of an absorbent cloth towel when using Complete as this has been shown to achieve the best results. When used on glass Complete resists streaking and smudging from fingerprints. Fogging on mirrors evaporates more quickly when cleaned using Complete.
